# Features:
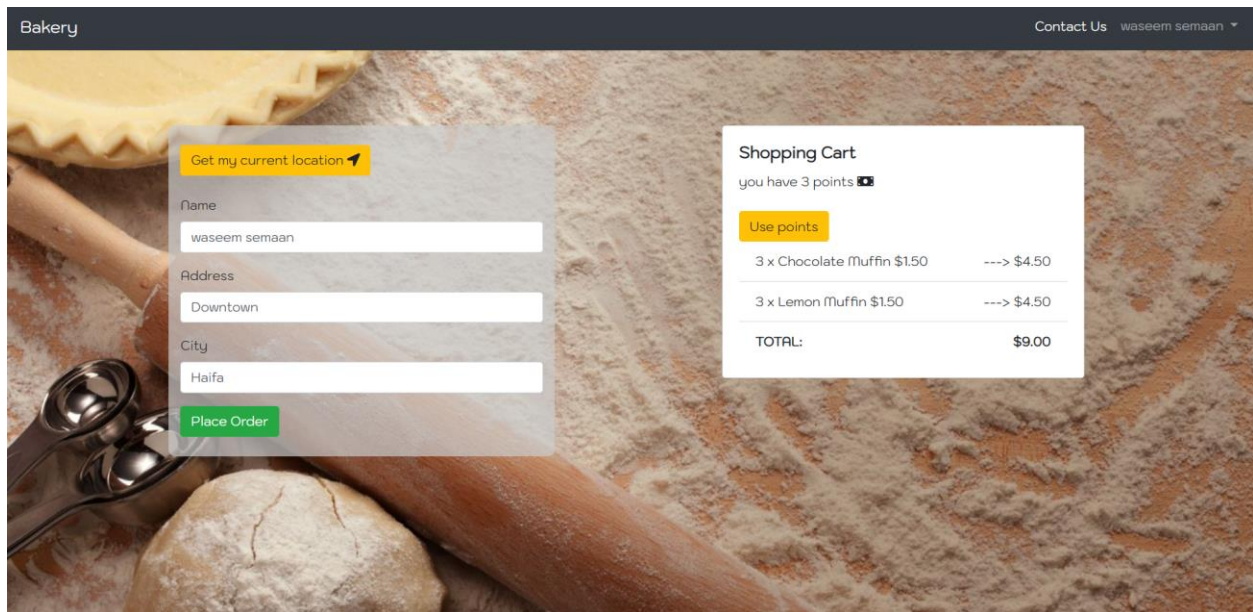

We have 3 permission levels who can use this application

Level 1, visitors (not logged in):

- Add products to shopping cart
- Increase or Decrease quantity of products in the shopping cart
- Clear shopping cart
- Login with Google

**Level 2, Logged in user: (in addition to visitor's features)**

- Check out
  - User's name is filled from his google account but can be changed
  - An option to get user's current location after asking the user if the location is correct. but it can be inserted manually or changed after using the current location
  - After placing the order the user can view the order summary
  - User can view all of his orders with the date, status and price of each order and the option to view each order's summary
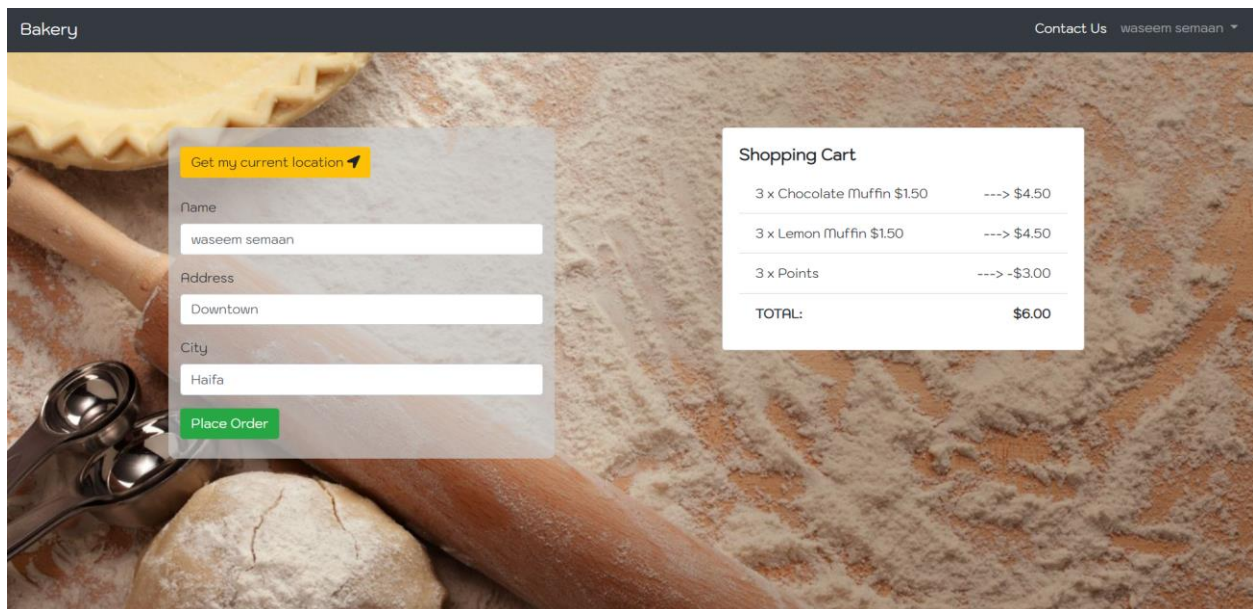

- Gaining points:
  - When placing an order, each 10$ will get the user 1 points which is equal to 1$ that the user can use in future orders if he wants to
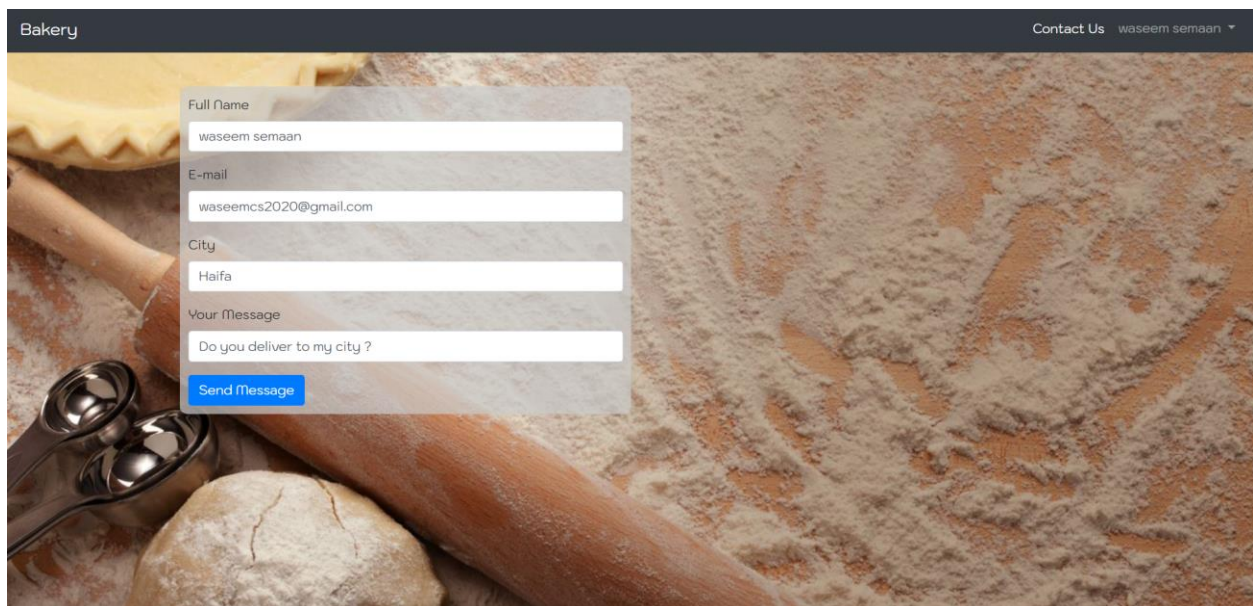

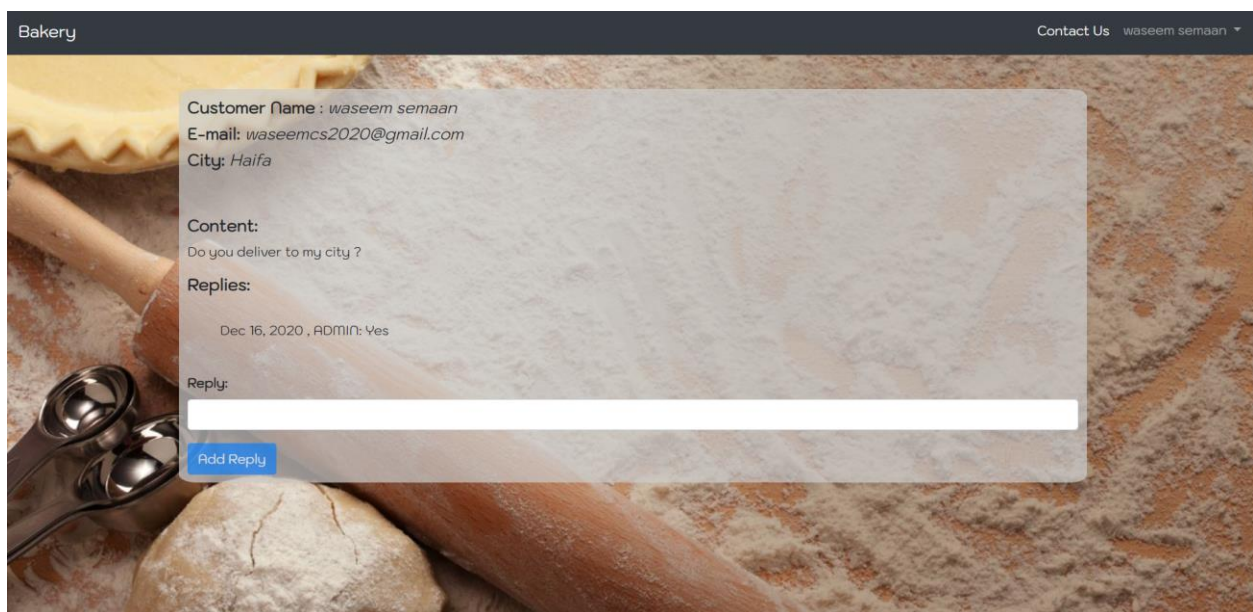

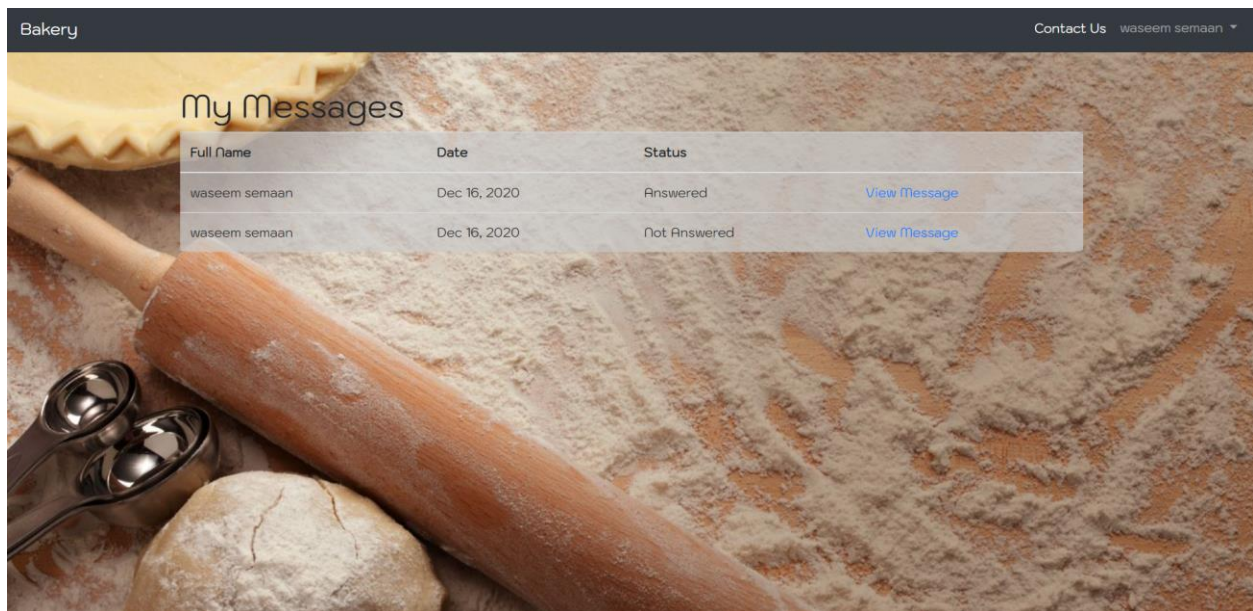

- Sending messages:
  - User can send messages to the bakery by clicking the "Contact Us" button in the home page,
  - Name and e-mail is filled from google account but can be changed also

- User can view all of his messages with the date sent and the status of the reply
- Once the admin replies to the message, the status will be changed to "Answered" and user can view the reply
- User can send another reply to admin's reply and the status will be changed to "Not Answered" and so on.
- Log out and get back to visitor's level

**Level 3, admin: (in addition to all previous features)**
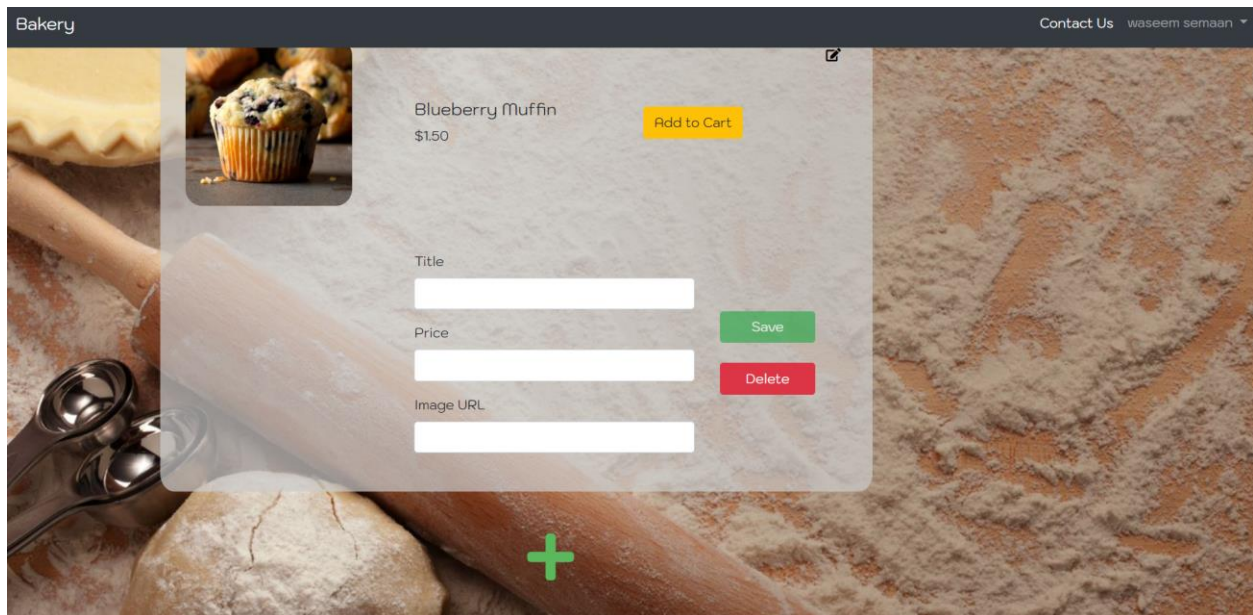

- Adding products
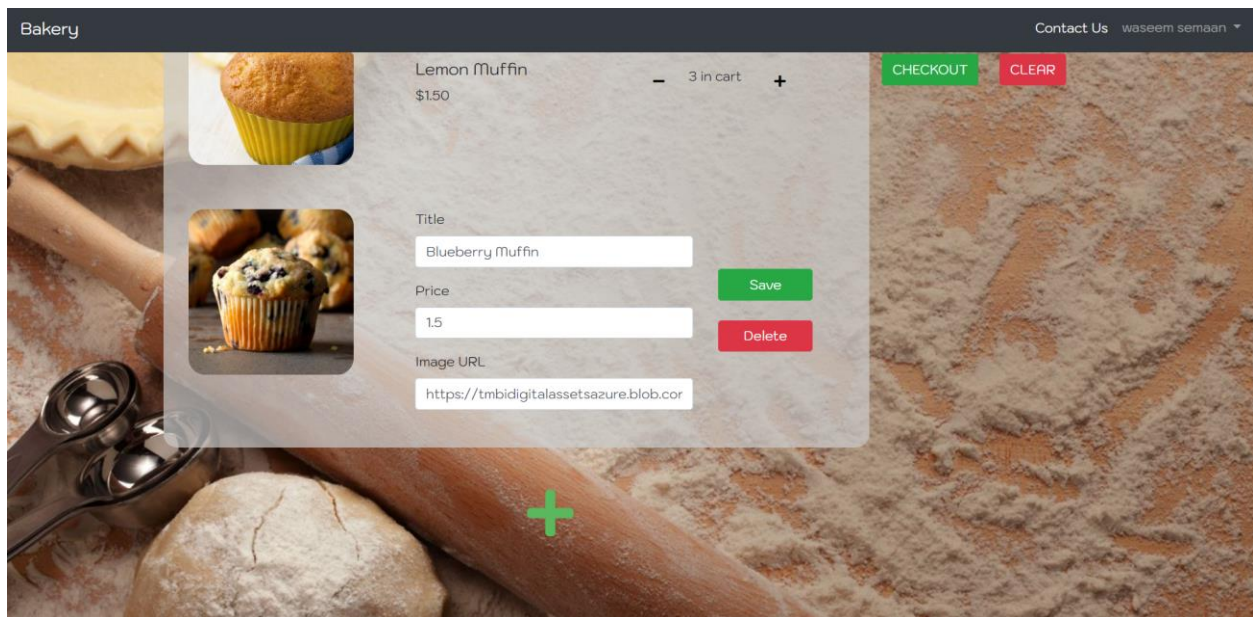

- Editing or deleting current products
- View all orders, Admin can view all orders of all users with price, status date and each order's summary

- Change order status to "fulfilled"

- View all messages, admin can view all messages from all users with the date and status and can send a reply to the message (as mentioned in the user's level)
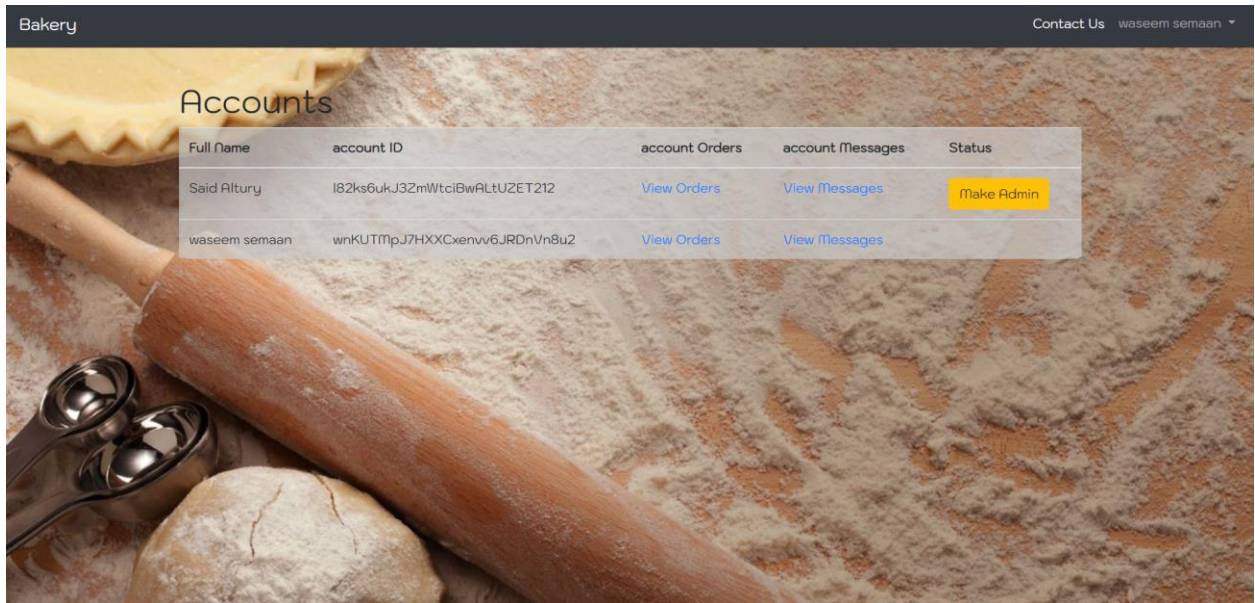

- Manage accounts

  - View order and messages from each account
  - Change each account status from normal account to admin or vice versa. Except for the root account it's status cannot be changed
